FRSA FASAE

Foresight First LLC

CEO

Why are we having this discussion?

Three Points

**The pandemic has
accelerated us
into the future**

**Every decision from
this point is a hard
decision**

**We must
prioritize long
term thinking**

Three More Points

Foresight is an intentional process of learning with the future

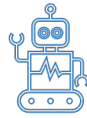

Association boards have a duty of foresight

There are four forces of turbulence on which association decision-makers should focus their attention

Four Forces of Turbulence

The impact of artificial intelligence (AI)/automation technologies on human beings

The worsening climate crisis

The surge in human inequality

The rise of ideological extremism

THANK YOU!
